Professional Summary

Technical Product Manager with over 4 years of experience driving B2B SaaS and fintech products, backed by 1+ years of hands-on software engineering. Expert in translating complex RFPs and tender documents into clear, actionable Product Requirement Documents (PRDs) and technical specifications. Proven success managing product lifecycle end-to-end, collaborating with engineering and business stakeholders to deliver scalable and innovative solutions aligned with client needs and contractual obligations. Skilled in Agile Scrum methodologies, backlog prioritization, sprint planning, and cross-functional stakeholder engagement.

Core Competencies

RFP & Tender Analysis | Product Requirement Documents (PRDs) | Technical Specifications | Software Development Lifecycle (SDLC) | Agile & Scrum | Sprint Planning & Backlog Management API & Microservices Architecture | Cloud Platforms | Stakeholder Management | Cross-functional Collaboration | Jira & Confluence | B2B SaaS Product Management | Technical Solution Presentation | Roadmap Planning | Client Engagement | Problem Solving & Communication

Technical Skills

Languages & Tools: SQL, Python, Jira, Confluence, Mixpanel, Firebase, Figma | Technologies: APIs, Microservices Architecture, Cloud Platforms (AWS/Azure basics) | Methodologies: Agile Scrum, Kanban, SDLC | Documentation: PRDs, Technical Specifications, User Stories, Test Cases

Professional Experience

Wipro Gallagher Solutions, Noida - Associate Product Manager (Consultant) | Jul 2022 – Present

- Led end-to-end development and launch of a configurable credit card origination platform, automating 95% of applications (up from 60%), enabling \$59M+ client onboarding, and eliminating manual workflows with 97% auto decisioning.
- Managed Agile operations with cross-functional teams of 15+ with backlog prioritization (PRDs, use cases, user stories), reducing delivery cycle time by over 75% and decreasing release errors by 30%, honoring fiscal and timeline constraints.
- Conducted product demos and customer engagement sessions validating enhancements via usability testing, feedback, and experiments.
- Coordinated with finance, legal, and compliance teams to align business objectives with regulatory needs.
- Used product analytics (Mixpanel, Firebase) to analyze funnels and market trends, informing GTM strategy and product improvements.
- Steered product lifecycle delivery from concept to launch, actively collaborating with software developers and UX designers using Figma for wireframes.
- Analyzed complex RFPs and tender documents to extract detailed technical and functional requirements, creating comprehensive PRDs and system workflows for engineering teams.

- Partnered with sales, pre-sales, and client-facing teams to ensure product alignment with client expectations and drive stakeholder satisfaction.
- Presented technical updates and demos to internal teams and external clients, ensuring transparent communication of product progress and capabilities.

Developer | Jun 2021 – May 2022

- Built scalable APIs and optimized software development workflows, improving performance by 20%.
- Partnered with engineering teams to experiment with new frameworks, validate performance metrics, and enhance product features.

Veefitt Ventures Pvt Ltd, Jalandhar - Product Manager (Founding Member) | Aug 2019 – Apr 2021

- Founded "Ovis," a fitness-focused SaaS CRM with MarTech personalization features, built to drive revenue growth and improve customer engagement.
- Applied analytics, market trend insights, and roadmap planning to improve product vision and GTM strategy.
- Designed use cases, PRDs, user stories, and collaborated with software developers on usability testing and validation to reduce acquisition costs.

Independent Product Projects

- Built AI-assisted P2P chess gaming platform and hyperlocal AI-powered delivery apps; validated product-market fit via surveys, user feedback, and pilot testing.
- Integrated product analytics funnels to improve customer engagement.
- Focused on revenue growth, GTM strategy execution, and roadmap planning for scaling prototypes.

Key Projects & Achievements

- Directed discovery workshops for a \$59M banking project, ensuring seamless integration of finance/legal compliance systems into product lifecycle management.
- Delivered 10+ PRDs and RFPs for new mortgage & credit card products, ensuring regulatory compliance and stakeholder communication alignment. Improved demo-to-sale conversion by 30% and UX-driven 30% CSAT uplift via comprehensive redesign of 750+ screens across web and mobile.
- Drove innovation and collaborative problem-solving, turning complex issues into product improvements using a data-driven approach.
- Automated loan origination workflows, reducing manual processing and accelerating client onboarding contributing \$59M+ revenue.
- Reduced delivery cycle time by 75% and release errors by 30% through improved backlog prioritization and sprint management.
- Led UX redesign impacting 750+ screens, resulting in a 30% lift in demo-to-sale conversions and 30% CSAT improvement.
- Mentored junior team members enhancing agile delivery efficiency and stakeholder collaboration.

Education & Leadership

B.Tech, Instrumentation and Control Engineering

Dr. B.R. Ambedkar National Institute of Technology, Jalandhar | 2017 – 2021

- Head, Robotics Club; National competition leader and project innovator.
- Winner, ESVC 2019 (Electric Solar Vehicle Championship)
