Professional Summary

Product Manager with 4+ years of experience building and launching enterprise-grade SaaS products at Wipro. Proficient in the full product lifecycle, from ideation and user research to roadmap planning and go-to-market execution. Currently transitioning into B2C product management through self-initiated product builds in consumer gaming and hyperlocal delivery. Previously built a fitness CRM product in college as part of a startup. Passionate about solving real-world problems through data-driven decision making, user-first design, and fast iteration.

Core Competencies

Product Strategy & Roadmapping | Agile/Scrum & Sprint Planning | B2B SaaS & Workflow Automation | B2C Growth & Retention Strategy | User Research & Prototyping | Basic Dev Debugging: React, Vite, Flutter (AI-assisted) | SQL, NoSQL, Python (basic), Jira, Google Analytics, Lovable | Cross-functional Collaboration

Professional Experience

Wipro Gallagher Solutions – Associate Product Manager (Consultant) *Noida* | *July 2022 – Present*

- Managed product strategy and delivery for a leading B2B lending SaaS platform.
- Led UX redesign for over 750+ screens, resulting in improved demo conversions and client engagement.
- Authored BRDs, FSDs, and API documentation ensuring cross-team clarity.
- Launched auto-decisioning workflows in credit card origination, increasing throughput by 30%.
- Reduced time-to-demo from 6–9 months to 1 month through launchpad product optimization.
- Partnered with engineering and QA to ensure timely, scalable releases; reduced delivery cost by 30%.
- Led third-party integrations (LexisNexis, Experian) for fraud checks and KYC onboarding.

Wipro Gallagher Solutions – Developer *Noida* | *June 2021 – May 2022*

- Developed and maintained enterprise financial products using .NET, Angular, and SQL.
- Contributed to front-end and back-end enhancements, improving feature response times and stability.

Veefitt Ventures Pvt Ltd – Product Manager (Founding Member) *Jalandhar* | *Aug 2019 – Apr 2021*

- Launched "Ovis," a B2C SaaS CRM workbench for fitness professionals, as part of a college startup.
 - Defined feature roadmap, led user interviews, and oversaw development lifecycle from ideation to launch.
-

Product Projects (Independent Work)

ChessGambit – Peer-to-Peer Real Money Gaming (In Development)

- Building a real-money chess app using React, Vite, NoSQL (game data), and SQL (ledgers & compliance) with AI-assisted debugging and iteration.
- Validated idea through a survey with 300+ responses and waitlist signups.
- Designed key features: wallet, matchmaking, leaderboard, KYC onboarding.
- Currently building MVP and exploring compliance with gaming regulations.
- Focused KPI - Waitlist → Active Conversion Rate , DAU/WAU, Games per User per Week , KYC Completion Rate, Deposit-to-Play Conversion, Match Completion Rate

OutCry – Hyperlocal Delivery App (Prototype Stage)

- Targeted delivery of party essentials and last-minute items during peak hours.
 - Built on top of an open-source Flutter app, customized using basic dev knowledge and AI debugging support to match use cases and enhance UX.
 - Ran manual pilot in NCR; achieved 80% reorder rate from early users.
 - Developed product vision, pricing strategy, and retention flows.
 - Focused KPIs - Orders Per Night, Repeat Order Rate, Average Order Value (AOV) – $\text{total revenue} \div \text{number of orders}$ (profitability lever), Delivery Time (Order-to-Doorstep) – avg. minutes per delivery (experience KPI), Gross Margin per Order – $\text{revenue} - \text{direct cost of goods}$ (unit economics), Stockout Rate
-

Education

Dr. B.R. Ambedkar National Institute of Technology (NIT Jalandhar)

B.Tech – Instrumentation and Control Engineering | 2017 – 2021

Note - Details about independent product projects are based on self-initiated work conducted outside of full-time employment. Full documentation and prototypes available upon request.
